Rio de Janeiro, RJ, Brazil | (21) 97058-3081 | matheusnevessp@gmail.com | linkedin.com/in/matheusnsp | github.com/matheusnsp | [Portfolio](#)

Software Engineering (Australia), with experience in infrastructure, information security and secure web system development.

OBJECTIVE: To work as a **Junior Information Security Analyst** or **IT Analyst**, applying knowledge in Windows and Linux environment security, network traffic analysis, monitoring, and system protection.

SUMMARY OF QUALIFICATIONS

- Bachelor's degree in **Software Engineering** from the University of Canberra (Australia), with an emphasis in **Cybersecurity**.
- Coordination of **IT infrastructure and information security** at the Brazilian Red Cross (assets, IAM, network monitoring) and development, from scratch, of a **production web system** with secure authentication, access control, and LGPD compliance.
- Projects involving **generative AI, pentesting, and responsive web applications**; Scrum, GitHub, and delivery of scalable solutions.
- Fluent in **English and Portuguese** (4 years of residence in Australia).

EXPERIENCE

IT Infrastructure & Security Coordinator | Brazilian Red Cross, Rio de Janeiro | *Feb 2026 - Present*

- Technical auditing and diagnostics of the technology park; secure data disposal protocols and control of storage assets (HDDs); network expansion (L2/L3) and remote monitoring/IP CCTV with a focus on **IAM**.
- Design and development of the **institutional website and administrative management system** for the Training School (CVB-RJ), with **Node.js, Express, PostgreSQL, Prisma, EJS**, password hashing with **argon2id, CSRF, rate limiting** and **Zod** validation; student, enrollment, class, and financial management, and banning after suspicious activity; now with **169 registered students**. [Repository](#)

AI & Robotics Development Intern | Robot De Niro, University of Canberra | *Jul 2024 - Nov 2024*

- Interactive generative-AI platform (GPT-4, Whisper, Eleven Labs) for a theatrical robot; real-time pipeline with latency reduced from **7.5s to 4.2s**. Presented at the *Questacon Science Museum* (Australia).

ACADEMIC AND PERSONAL PROJECTS

- **NetScan**: Python reconnaissance tool for pentesting: ARP host discovery, concurrent TCP scanning, automatic CVE correlation via the NVD/NIST API. [Repository](#)
- **Dash**: full-stack financial dashboard with authentication and Row Level Security via Supabase. [Repository](#)
- **Secure Network Infrastructure (UC)**: corporate network with Windows Server, Linux, Active Directory, VLANs, and Cisco firewall (ACL/NAT). [Report](#)
- **Personal Portfolio**: React + Framer Motion, multilingual, light/dark mode. [Site](#)
- **INV Botafogo**: responsive institutional website (HTML, CSS, JS, Bootstrap) with continuous deployment via GitHub Actions. [Repository](#)

EDUCATION

- **Bachelor of Software Engineering**, University of Canberra (UC), Australia, completed December 2024. GPA: 5.67/7 (equiv. 8.1/10).

TECHNICAL SKILLS

- **Security & Networking**: Information Security, Wireshark, IAM, Active Directory, Firewalls (Cisco ACL/NAT), VLANs, argon2/CSRF, Risk Management
- **Backend & Databases**: Node.js, Express, Python, Java, PostgreSQL, Prisma, Supabase, REST APIs
- **Frontend**: React, JavaScript, EJS, HTML5, CSS3, Bootstrap, ASP.NET
- **Tools**: Git/GitHub, Agile & Scrum, Docker, Vercel, Netlify, VS Code, Virtualization (VMs)
